

Vinicius Pereira

Desenvolvedor de Software Backend

Email: niviciusdev@gmail.com

Phone: +55 11 952407277

Languages: Brazilian Portuguese native, English (B2)

LinkedIn: <https://www.linkedin.com/in/vfreitass/>

GitHub: <https://github.com/Obvim>

Experienced backend developer specializing in building scalable, high-performance systems. Proficient in **Golang**, **C** and **C++** with expertise in **microservices**, **cloud infrastructure**, and **database optimization**. Passionate about designing robust architectures and delivering efficient solutions for complex technical challenges.

Experience

Jinboo | Remote

Backend Developer

[September, 2024] - Present (9mo)

- Contribution to the design and implementation of an '**Online Booking Tool**' platform, impacting approximately **30% revenue growth**.
- Implementation and optimization of **APIs** for **performance** and **scalability** of the system to handle **5 million monthly requests**, using Go, GCP, gRPC, PostgreSQL, MongoDB, Microservices, Docker, Argo CD, CI/CD, Git.
- Development of robust cloud-native solutions with **Google Cloud Platform**.
- **Code reviewer** for other team members and **microservices**.
- Collaboration in agile teams to improve system **reliability** and **security** using **Scrum + Kanban** and **Jira**.

42 Labs | Remote

Software Engineer Intern

[June, 2024] - [August, 2024]

- Contributed to the design and implementation of a login platform for intern users in **C#**, **.NET**.
 - Led the **refactoring** of **legacy services**, **reducing latency** and **improving maintainability**.
 - Worked closely with **DevOps** to streamline **CI/CD** processes, improving deployment **efficiency**.
-

Personal Projects

Portfolio (<https://0bvim.github.io/portfolio>)

- A project being developed in my free time to showcase personal and academic projects..

Gelixir (<https://github.com/0bvim/gelixir>)

- A clone of the "gist" functionality, built with **Elixir** and the **Phoenix Framework**.

Goctobot (<https://github.com/0bvim/goctobot>)

- A project for **managing GitHub followers**, featuring functionality to follow back or unfollow. A CLI project built using **Golang**.

OctoBuddy (<https://github.com/0bvim/octoBuddy>)

- The web version of 'Goctobot', using **Go**, **Gin**, and **NextJs**. Still under development.
-
